For Immediate Release

LEX On Demand Opens Regional E-Discovery Facility in Atlanta, GA.

Vienna, VA – August 20th, 2008 – [LEX On Demand](#), a leading provider of E-Discovery Solutions to legal and corporate communities, announced the opening of a Regional E-Discovery processing and production facility in Atlanta, GA. This state-of-the-art facility will enable LEX to provide fast, local service to Corporate and Law Firm customers in the region.

“We are excited to be able to offer our Atlanta and South East regional customers the rapid turnaround, time-sensitive processing and expansion in capacity that the new facility will deliver,” said Rob Draper, Managing Director of LEX On Demand’s Atlanta facility. “Our clients appreciate the attention and consultation the Atlanta office provides and the new facility will enable us to extend that dedicated level of service combined with technical innovation that distinguishes us from other providers.”

The Atlanta facility is modeled on LEX On Demand’s National Technology Center in Washington DC. It incorporates LEX On Demand’s proprietary Track Based architecture which offers a flexible, scaleable solution with high throughput, built-in redundancy and smart hardware monitoring. The new Facility will enable ESI to be processed and produced for regional customers on site locally, thereby enabling faster turnaround times as well as further extending LEX’s EDD processing capabilities. The Atlanta EDD facility is fully integrated with LEX On Demand’s National Facility, enabling very large projects to be distributed over Facilities as required.

“Our new Atlanta facility will support the growth LEX On Demand is experiencing in Atlanta and the South East,” said Dave Tomaszewski, President of LEX On Demand, “and will enable us to provide a time-sensitive, fast turn-around service to our customers in the Atlanta and South East region while continuing to offer the quality customer service, supportive project management and consultative approach for which LEX On Demand’s E-Discovery services are known.”
